BULK DATA DOWNLOAD

Detailed Performance of a Link or Route

STEP 1

Select Link or Route ?

CHOOSE LINK FROM A MAP

CHOOSE ROUTE +

CREATE A NEW ROUTE

Understanding the Data

- This is vehicle probe data. It is a non-statistical sample of what is actually on the road
- Collected through a variety of sources, including Mobile Devices, Portable Navigation, Commercial Fleet, Sensors, etc
- Speed/Travel Time Data only (no volumes)
- No vehicles => no data (usually late PM)
- No vehicle => historical data

Understanding the Data

- Network Coverage
 - Highways and arterials in State of Oregon and Clark County, WA
- Data Quality
 - More data points in higher populated areas
- Traffic Message Channel (TMC)
 - Unique identifier code
 - Length varies
- Data Granularity
 - 5 minutes, 15 minutes, hour, day

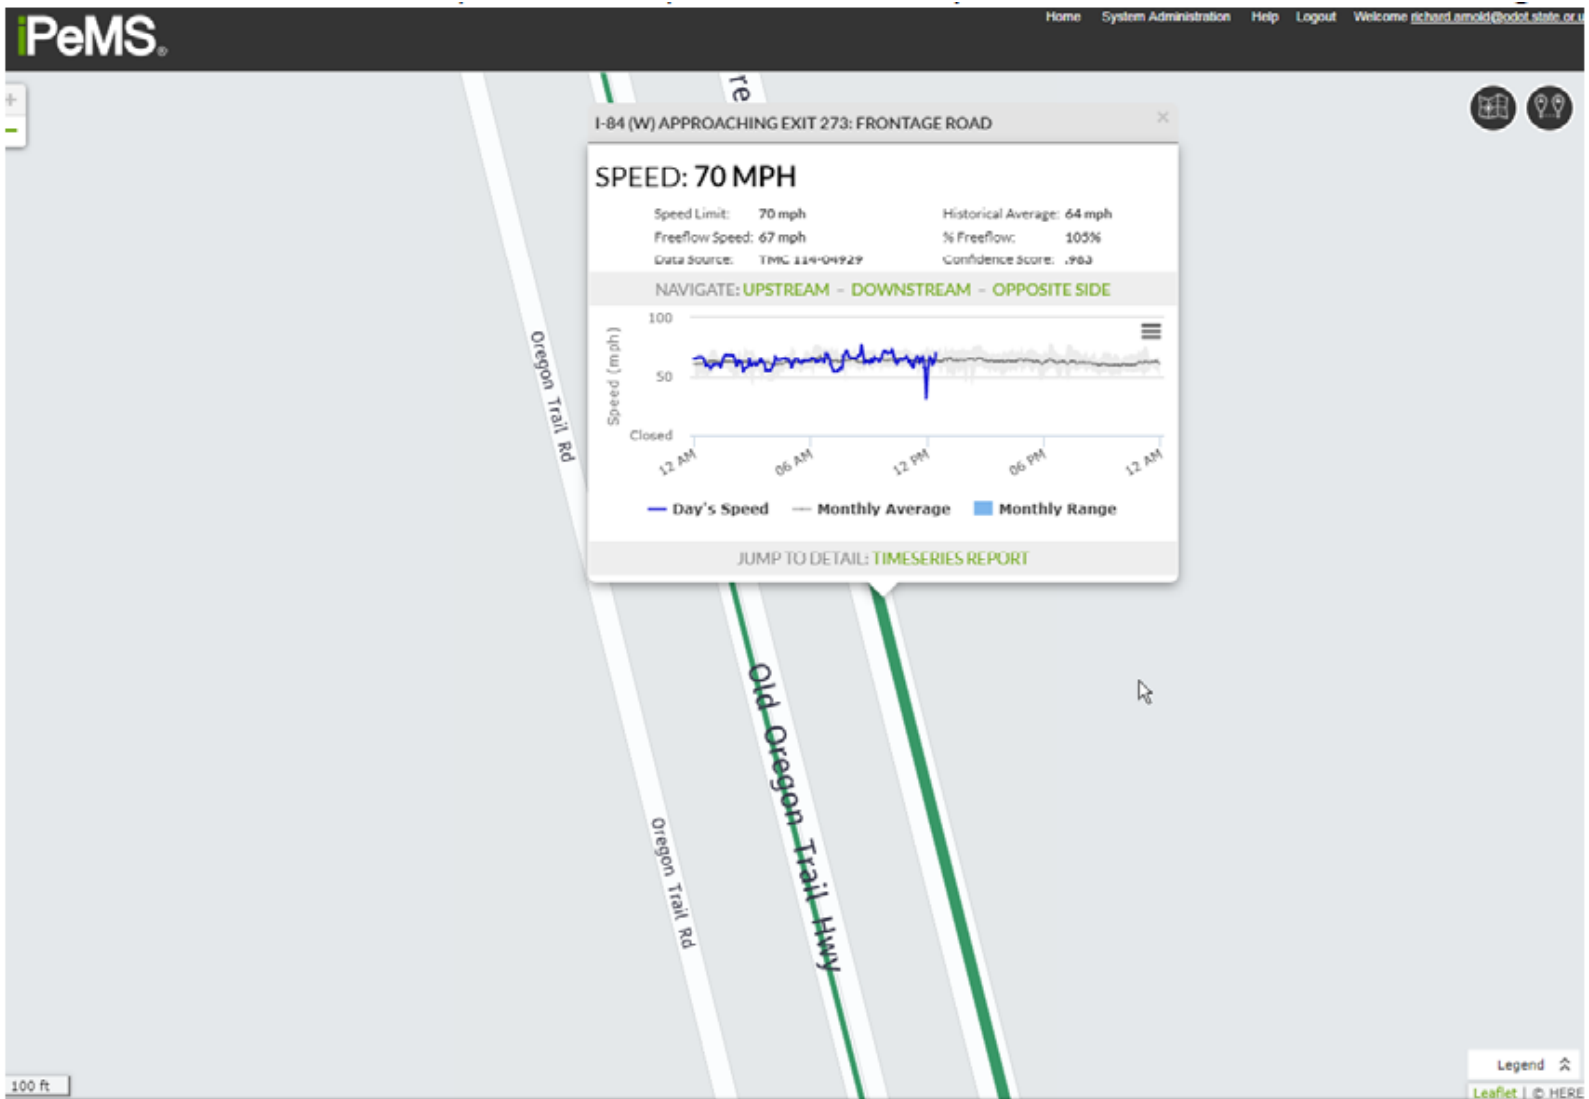

iPeMS Uses

- Create and save your own routes
- Select date range
- Select performance measures to display
- Create reports
- Export data to text or excel files
- Bulk data download

Contours Report (Time-Space Heat Map)

Speed for Route I-5 SB (15e of 15, CPR 5SB1)

Mon 09/16/2019 06:00-18:59
Traffic Flows from Bottom to Top

Animation Report

Types of Applications (ODOT)

- Corridor performance
 - Trends (annual, monthly, etc)
 - Before/after construction
- Work zone analysis
- Bottleneck analysis
 - Identify locations, categorize severity
 - Congestion “heat map” scans
- Construction before/after studies
- Reliability analysis

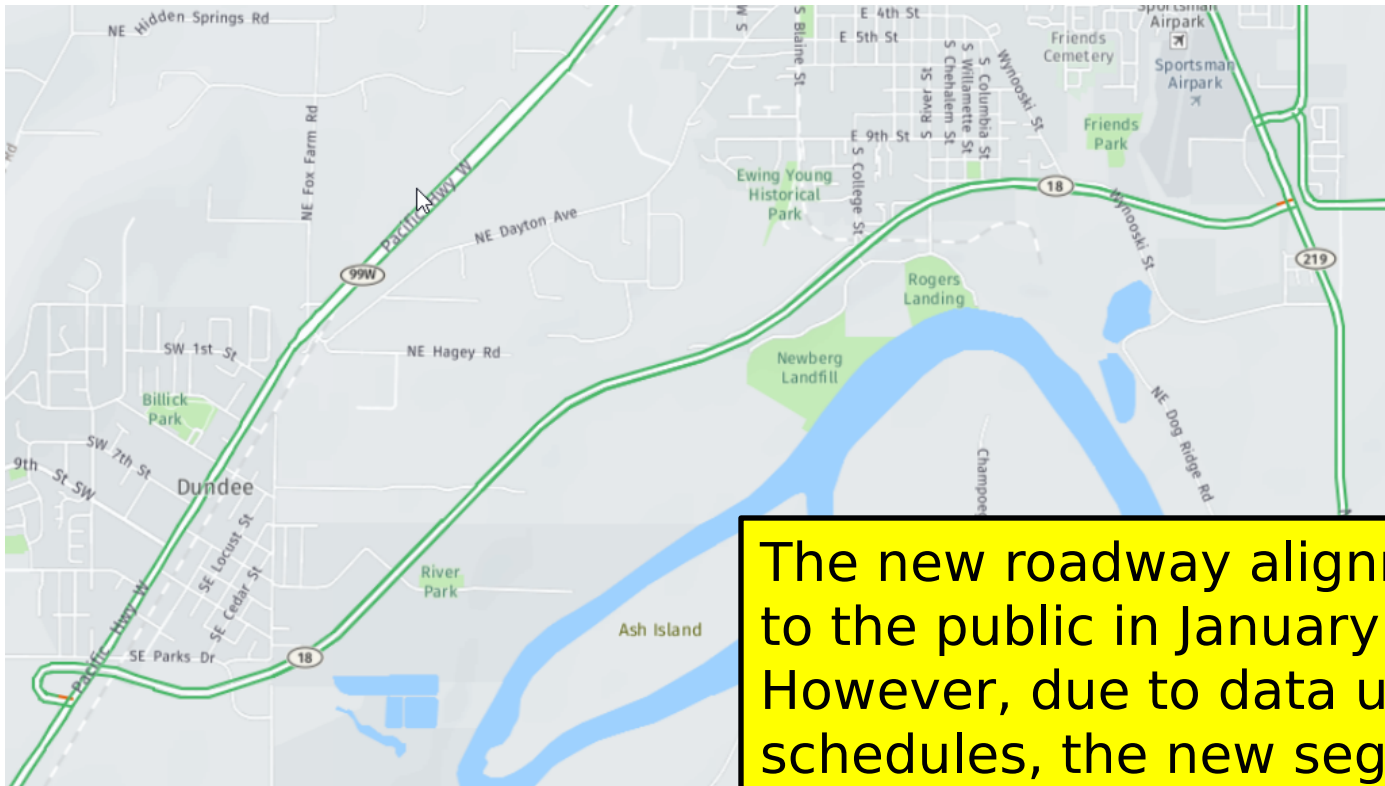

Example: Before & After

- Speed Limit Changes in Central & Eastern Oregon

Example: Newberg-Dundee Bypass

The new roadway alignment opened to the public in January 2018. However, due to data update schedules, the new segments were not immediately available; the Before/After study could only be done on the OR99W segment.

Example: Newberg-Dundee Bypass
